Re-tool the Oshawa General Motors plant & make it public!

To the Legislative Assembly of Ontario. When General Motors announced that they were closing their plant in Oshawa, it was devastating news for workers and their families and the community. Despite receiving \$10.8 billion in public handouts, General Motors has decided to throw thousands of people out of work.

WHEREAS, without a bold new plan, 5000 workers at GM and supplier companies will lose their jobs this Christmas, as the global auto giant shuts down the factory. The total loss will be closer to 20,000 jobs as local businesses tied to the Oshawa plant collapse.

WHEREAS, climate change presents both an urgent threat and an opportunity to transition off fossil fuels to an economy with good green jobs.

We, the undersigned, petition the Legislative Assembly of Ontario, to take the General Motors Oshawa plant into public ownership, and maintain jobs and manufacturing capacity by re-tooling to manufacture electric vehicles or products that will lead the transition to a sustainable energy economy.
